DETAILED ACTION

The status of the claims

Claims 1-6, 8, 10 and 11 are pending in this application. Original claims 1-6, 8, 10 and 11 were subjected to restriction and election of species. The details are below.

Election and Restriction

This Office Action is in response to applicant's remarks filed on Jan 21, 2009. Claims 1-6, 8, 10 and 11 are pending. Claims 10 and 11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Claims 4 and 6 are withdrawn from further consideration as being drawn to a nonelected species. Applicant's election without traverse of the restriction requirement in the reply is acknowledged. The requirement is deemed proper and is therefore made FINAL. Claims 1-6 and 8 are examined herein sofar as they read on the elected invention and species. The elected specie is free of the prior art. The search will now be broadened to encompass the full scope of the elected group. Therefore, claims 1-6, 8 are now being examined.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

Art Unit: 1617

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of the copending Application No. 11/885,425. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of U.S. Patent Application 11/885,425 embrace the instant claim 1. The core structure of the compound described in the claim 1 of the instant application encompasses the core structure of the compound of formula (I) of claim 1 of the copending Application No 11/885,425.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim of U.S. Patent No. 6,936,622. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claim embrace the compound as claimed in the US patent 6,936,622 (col 21 claim1). The core structure of the compound described in the claim 1

Art Unit: 1617

of the instant application encompasses the core structure of the compound of formula (I) of claim 1 of the US Patent 6,936,622.

Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim of U.S. Patent No. 7,470,704. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claim read on the compound as claimed in the US patent 7,470,704 (col 24 claim1). The core structure of the compound described in the claim 1 of the instant application reads on the core structure of the compound of formula (I) of claim 1 of the US Patent 7,470,704.

Claims objection

Claims 2-6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Claim 1 is stand rejected and claims 2-6 and 8 are objected.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MANU MANOHAR whose telephone number is (571)270-5752. The examiner can normally be reached on Mon - Thu 9.00AM to 4.00PM.

Application/Control Number: 10/591,955 Page 5
